You must be joking. I oppose this. We are in the USA, not the old Soviet Union.

First, for the Washington State Department of Ecology to refer to themselves in any document as "Ecology" is questionable from a legal perspective, and imbecilic from a literary one. Question:

From where did this Orwellian idea originate? Who thought of this? Was this a directive from outside of the State of Washington? It seems similar as to why Dutch farmers are protesting.

Whoever thought of or bought into this idea...you're fired. You do not have enough common sense to be working in the public sector.
