Please clarify what a small CAFO is. It would seem obvious that it should not include the non commercial operation by a family with a dozen or so chickens or a family raising a couple of beef or hogs. But it doesn't say that at all, onl "less than" 150 horses, 1,500 ducks, or 25,000 laying hens. There is a LONG way between those. I would suggest language that clearly exempts those with as an example "less than - 15 large animals, to include but not limited to goats, horses, cows; 150 birds, to include ducks, laying hens."
