

Anonymous Anonymous

This is my comment on the CAFO regulations that the Federal EPA is forcing compliance on all state governments. I will remain anonymous to forestall retaliation.

Please note that the EPA is an unaccountable, corrupt, unelected bureaucracy that has turned into a rogue entity willing to punish and fine ordinary American citizens, for the smallest infraction of their rules. Over the long history of bureaucracies, we have noticed that they always become corrupt and tyrannical. That is what unaccountable power becomes, therefore I do not expect my comments to make any difference in the outcome.

During this time of inflation being the highest in five decades, fuel costs higher than ever, more than 100 food suppliers throughout the country have been destroyed by fire, people across the country being unable to have food security, supply chain issues for all products that used to be readily available, government spending that is the highest ever recorded along with the ever increasing national debt, interest rates dramatically rising, the death of the petro dollar is imminent, covid vaccinations killing people with all manner of diseases all over the world especially with our younger people getting heart issues, droughts in California farmland, the midwest farmland decimated by weather, farmers paid by the US government to destroy their crops, nitrogen fertilizers to become unavailable, illegal covid lockdowns that destroyed most of main street businesses, proxy war in Ukraine targeting Russia (one is foolish to mess with Russia, they have more and better weapons than the US does), Taliban takeover in Afghanistan with the loss of billions of dollars worth of military equipment and loss of control of the billion dollar base along with the deaths of a dozen military personnel all caused by inept leaders of this country who stole the election in 2020. There is more, but enough of that for now.

It is obvious that there are people and organizations within and without our nation that are in the business of destroying this nation. The WEF, Soros, UN, WHO and the Marxist Democrat party are five easily identified organizations. While China wants to see the end of the US, our current leaders coddle the CCP and even do their bidding. Notice the incredible influx of illegals from 141 nations, many of whom are military trained and/or dangerous criminals who will do damage to this nation into the foreseeable future.

Now you will be fining and imprisoning people who are in the business of providing food (milk, eggs, beef, poultry, pork, vegetables) and any one who has a small patch of land with a few chickens and other fowl. If nothing else food prices will rise dramatically solely because of your efforts.

It is long known that food will control a population. The lack of it will cause chaos. You will be sewing the seeds of the destruction of this 240 year experiment in freedom. Make no mistake, everyone complicit in this will be held accountable. You are warned.
