

## Ronald Cox

This proposed program (CAFO) should only apply to areas that endanger water sources or have animals for commercial use ie. dairy, meat, wool, or any other commercial use. Personal pets or hobby animals (horses to ride etc.) should be excluded as should animals raised by 4H or FFA . Permits and inspections just to have an animal on property violates a person's right to own a pet or have any kind of animal (may include service animals) without just cause . This proposed Program (CAFO) does not reflect good judgement or sense on the part of Ecology.
