

Vivian Chambers

When you can not even fill the job openings for dairy inspectors for the whole state. You have only one guy now doing the this state. You want to regulate more things that is wrong.

Applying CAFO standards to small operations, will be devastating to local food production and our overall food security.

Ecology must recognize the work of the Voluntary Stewardship Program and local conservation districts. Instead of regulating, Ecology needs to encourage participation in these voluntary programs, proven to protect water quality.

Sincerely,

Vivian
