

Angela Gilman

This rule of law that is trying to be passed needs to be stopped. We the people have the right to raise our own food. We the people have the right to buy local from our farmers. It lets us know who takes care of the meat and where our meat is coming from. I buy 90% of our beef from a local family farm. Best beef I have ever had. This will hurt a lot of families who are trying to live sustainably and hurt a lot of small farmers who bust their ass dusk till dawn to provide good quality meat and provide for their families. I don't want meat from another country or it being "dyed" to look red and fresh. Let's stick it to the little man. How about let's not!!! Let us grow our own food. We don't need to feed these greedy corporations and the govt. let the small families and farmers farm their own food.
