

Kristina Hafey

I am a small hobby farm in rural Thurston county. I raise dairy goats, and utilize my milk to produce meat for my family through feeding of pigs and/or cows. The proposed language is too vague! Is the intention to go after small producers who operate small hobby farms for personal needs? It shouldn't be! The language needs more defined requirements around acreage, and number of livestock on the premises! We are a right to farm state and imposing such ridiculous regulations on small hobby farms will devastate many!
