

Plant Available Water (PAW) October 13, 2021 through January 11, 2022

Dairy Field with triticale planted. This soil moisture data shows some small impact of the precipitation event mostly within the top 8", but soil moisture is below field capacity at all depths.

Plant Available Water (PAW) October 13, 2021 through January 11, 2022

Dairy Field with triticale planted. This soil moisture data in a rocky field shows some impact of the precipitation event mostly within the top 8". While the 8" sensor was impacted and did go over field capacity, the subsoil remained relatively unchanged.
