

Harry Branch

hypothesis>test>conclusion. The interrelationships between physical, chemical and biological parameters are not considered. It relies on logical fallacies including the appeal to Ignorance, the false dilemma, the hasty generalization and ever present equivocation, using words to confuse or mislead.

The Port has lost millions of dollars in lawsuits over Clean Water Act violations. Where the Port and the City have prevailed, they've done so based on standing and archaic city codes -- anything but merit. This TMDL update is probably the result of Federal Courts demanding it and it's more of a regurgitation than a revision. The only way for anything meaningful to ever happen is via a lawsuit. This is because the system as it exists is broken. It's time for the Federal Government to step in and see that Federal Laws are followed.
