

## Eileen Hawes

I fully support the designation Outstanding Resource Waters for the Green River at the highest level of protection Tier III(A). I support safeguarding a precious freshwater resource for generations to come, especially as climate change threatens the intensity of rivers, streams, & wetlands. As an Oregonian, I appreciate the precious resources across nearby state borders. In Oregon, Waldo Lake has ORW designation and I adore that very cold magical lake for recreation and its pristine quality. Thank you.
