

## Lynn Stiglich

I strongly support the proposed Outstanding Resource Waters designations for the upper watershed of the Cascade River, the upper watershed of the Green River, and the Napeequa River. These public resources have been available to all for decades, and protecting these waters will ensure they will be available to be enjoyed long into the future. Additionally, these waters contain diverse, important ecosystems that need to be protected from harmful pollutants. That's why I fully support designating these sites as Outstanding Resource Waters. Our waterways are essential to the health of the land and all wildlife. Pressure from increasing human population and corporate practices is relentless and once the health of these areas is gone, it is unfortunately unlikely that situations can be reversed. Protecting them will ensure these waters and their ecosystems will continue to thrive for generations. I believe future Washingtonians should be able to enjoy these incredible waters just as much as we can today. Thank you very much for your consideration and advocacy.
