

Definitely Mabie Consulting

I commend Ecology for considering the Green River (Mt St Helens) for uber protection under the new Outstanding Resource Waters WAC. The Green River is a treasure for us, in the shadows of this state's most famous geologic feature. With the proximity of the Mt St Helens monument, protection of the Green, would be keep an incredibly valuable resource protected. Whether providing spawning ground for some of our most treasured fish species, adding to the beauty of the nearby old growth forest, or providing recreational opportunities, the Green gives and gives and gives. It's time for us to give back and give the river the protection it deserves.

As an ardent fly angler and outdoorswoman and a business owner who works in the realm of environmental issues, I urge you to ensure the Green River, along with the others proposed in this rule-making process, be included for protection.

Thank you.
