

Susan Evans

I may have commented previously but am thinking about my oldest grandchild with severe psoriasis. We came to Soap Lake to enjoy the buoyancy of the water and try the mud on his skin. Now that is a unique recreational experience if I ever heard of one. I lived in Wenatchee for 40 years and often went to Soap Lake. I know it was a healing center after WW1 for mustard gas victims. I know the local Indians came to Soap Lake for healing as well. It is truly a treasure that is like no other in WA State. Thank you.
