

## Ron Lindsay

I strongly urge you to include the Cascade River as an outstanding resource water. We have camped and hiked along the shores of the river and find it beautiful and wild. Lets keep it that way. I am also envolved with the Skagit Land Trust which owns and manages several properties along the river and I have helped to steward these properties in numerous work parties. It is essential that the river be maintained in a wild state for these properties to most benefit wild salmon populations and other wildlife that inhabits the watershed. Please include the Cascade River as an outstanding resource water.
