

Anita de Give

I'm writing in support of the proposed Outstanding Resource Waters designations for the upper watershed of the Cascade River, the upper watershed of the Green River, and the Napeequa River. These waters provide valuable recreation areas for thousands of Washington families, and they deserve protection. In addition, these waters provide clean water for salmon spawning, a critical resource for our state. These bodies of water are truly critical to a Washington way of life, and I urge the Department of Ecology to permanently protect these valuable natural resources. Thank you for your consideration!
