

Felicity Erdmann

I am involved in finding willing psoriasis subjects for accumulating information on how the mineral water and sediment base of the lake effects their lesions I am writing in support of Soap Lake"s designation as an Outstanding Resource Water - Tier III(B)., Soap Lake has unique, mineral-rich water created by the geology of the region concentrating the minerals in the water and the mud., This is a regionally unique recreational value and destination for healing nature of water. Used since pre-historic times to heal and rejuvenate people living here., The layers of water that do not mix in Soap Lake. This is unique. The chemically stratified layer of naturally formed meromictic lakes ... has evolved uniquely adapted species. I am able to attest to the fact that anonymous subjects who have chosen to have before and after photos taken of their psoriatic lesions, have shown definite visual improvements and state great relief from the burning and itching which is a hallmark of this autoimmune condition.
