

Marilyn Herke-Canterbury

Dear Sirs, Please postpone or even better STOP ALL plans to implement any Tier III water plans. There are too many regulations already. As a private timberland owner I've witnessed first hand the over regulation of land use. TRANSPARENCY is KEY in building trust and you must listen to the concerns of land owners and others for limiting use and enjoyment. The forest with so many old trees are ready to burn like we seen this summer. Bring back the livestock and grazing to make the forest healthy again.
