

Natural Medicine

For over 25 years I have had a small medical practice in Soap Lake, Wa. For people with skin conditions and general revitalization the feedback from patients and visitors has been enthusiastic as to the medicinal benefits and beauty of the setting of this unusual lake, Soap Lake. I have had firefighters who came to the lake to heal their burn wounds in a faster manner(my patient's report), eczema, arthritis improved. Circulatory issues to the extremities have given the town it's reputation when clinics were established in the past.

The unusual mineral content needs to be preserved for future generations and patients.

Thank you for your considering the value of this natural resouces.
