

JANE NICOLAI

Take care of the beautiful gifts and natural resources we have. It's not a resource if it is despoiled or destroyed. We all live downstream and depend on the clean water, recreation opportunities, \$26.5 billion in annual expenditures, and 264,000 jobs throughout Washington State. Clean water is critical to this economic sector, the health of the ecosystem, and by extension, the health of all of us.

Please use your office and power to protect the health and wellbeing of all Washingtonians by establishing the first Outstanding Resource Waters in our state.
