This is a Public Comment for Kathy Kiefer: At her request:
a submission of her documentary "Dirt Roads... A Window to Soap
Lake's Past" which can be found at this link...

<https://www.youtube.com/watch?v=HDSQ3oQkAAM>

Due to her traveling "in the service of those in need in wilderness areas" outside the country and often without a "dependable signal" she asked me, as president of Soap Lake Conservancy, to post this video as her personal Public Comment statement... regarding the importance of her being able to support the Department of Ecology's approval of the Outstanding Resource Water tier111b protections for Soap Lake.

The video 'says it all' she says : Soap Lake is a "unique in the world mineral lake" which is increasingly threatened by the encroachments of modern civilization's needs.
