

## Grant County Commissioner

I am concerned that there has not been enough understanding of just what this designation means. Local officials and residents really need to be aware of just what the two organizations that applied are concerned about and want to happen to this body of water and its uses. I would ask that this process be extended or postponed until at least later in 2024 and that there be further outreach to local officials and the public to truly understand the significance of ORW designations.
