

Eric Gocke

I am a Water Treatment Plant Operator for the City of Chelan and my job requires that I have a Waste Water 1. I don't work in any part of sewer and I am not going to transfer from water to waste water, I like working with clean water. A \$200 renewal fee for people not even doing any waste water work is a bit high. I understand for people in waste water at level 2 or 3 paying this price, but it seems a bit excessive for non-sewer employees. Maybe come up with a fee structure for the different levels, starting at OIT through level 4. Just a thought.
