

Steve Fransen

Chapter 2: Crop System: Conservation Crop Rotation, Contour Farming, Intercropping, Strip Cropping, Alley Cropping and Cover Crops. I would suggest removing all information from "Chapter 9 Appendix Part A: Effectiveness Synthesis Crop Systems but retain "Chapter 2 Appendix Part B: Implementation Considerations (Crop Systems). Chapter 9 Appendix Part A is well written literature summary of key cropping system methods used around the world and provide good background based on that perspective. However, I think is greatly lengthens Chapter 2 without much practical support or recommendations for WA ag commodities. Chapter 2 Appendix B does provide needed information so should be retained.
