

# Glenn ROLLINS

Dear Sir or Madam,

Defend and keep your first rules. Better yet make them more strict. Use the data and science to support your position. DO NOT FOLD TO THE POLITICS. This is not the time to be soft on water treatment facilities. All life of the Puget Sound is relying on you to stand firm. Please do not merely make licensure voluntary. Yes, that makes less work for Ecology, but will degrade the Sound tremendously.

Thank you for your time.

Glenn Rollins
