Why has NOTHING been done about the squatters that "illegally took" land belonging to a deceased Canadian owner?? They have added 2-3 more RV's on the small piece of land that is on the bank of the California Creek...where are they dumping their waste tanks?? Property owners in the County who have a septic tank must get it inspected... Inspection on our property is required! I was told no one is going there because of the "private property" signs!
