RE: Kalama mtg. and Marine Export Facility  
Draft Sound EIS

Dear Mr. Doenges:

I am writing regarding the above project and to express my strong hope that the permit for this project be denied. While the draft EIS goes into great length regarding methanol / greenhouse emissions, I did not see where it addressed the issue of potential contamination of the Columbia River. Is Innovation NW prepared to evacuate all of the people downstream from the plant in the event of an accident and assume full responsibility for its cleanup? This project is a disaster on many environmental levels and is not in the best interest of the State

of Washington — not its land, not its  
rivers, and not its people. I strongly  
urge that this proposal be denied.

Thank you for your consideration,

Sincerely,

Kimberly Sims
