Mr. Rich Doenges

P.O. Box 47775

Olympia, WA 98504-47775

Dear Mr. Doenges,

I am opposed to the Kalama Manufacturing and Marine Export Facility in any form. The first rule of "holes" states that when you are in one, stop digging. We are in a climate crisis. We need energy solutions that don't add to the problem. There is no way to mitigate the downstream effects of this facility: the health impacts to the people of Washington, (it turns out that pollution even exacerbates the effects of Covid), the fuel needed for transport, and the risk of spills to and from the facility, to name a few. All of this so the people in China can make more of the plastic that clogs our oceans.

At some point, if we are going to save this planet, we need to start saying, "NO", to more fossil fuel facilities. Please do the right thing.

Sincerely,

Carol von Borstel, Sequim, WA
