

Mark Counts

Are we, the citizens of Cowlitz County to believe that the world's largest methanol plant is in any way a long term benefit to the environment?

Driven by the intrusive monetary agendas tied to those of a hostile foreign country, this proposed industry will only serve to drive yet another large nail into the coffin lid of Earth's steadily worsening ecosystem.

Our ancestors would exhibit shock and outrage, as this situation should for any rational thinking person, at the threat this enterprise represents to future generations. I am disheartened to be living in a world that values greed and ignorance over stewardship and wisdom.
