

## Carole Onasch

We are experiencing Severe fires and Drought here in the West and world wide. Does the Planet Need a Methanol Refinery!?!? It would manufacture a component of plastics. Does the Planet Need more plastics?!?

We are experiencing mass Bio Diversity Loss....Climate Breakdown....Ecological Devastation! Is the solution to these horrible truths the Kalama Methanol Refinery? No matter how the proponents "Spin" the info..."like the Trump admin", Any Infrastructure...Any at all to do with Fossil Fuels is Devastating to all of life on our Planet. I write this as The West is swirling in Pain from Historic Fires. Portland Air Quality Index is high scale Hazardous....Need more be said?
