

## Minh Nguyen

I'm against Kalama Methanol Project. This is a disaster waiting to happen and will set the precedent for generations to come. Climate change is real and we need to work together to combat this crisis instead of contributing to it. This project will not only negatively impact WA, but the whole Pacific Northwest. This project is a morally reckless approach to the climate crisis at hand. It would also cause a huge amount of climate pollution, please believe in the Science and vote against this project.
