

Greg Hoffman

"We are facing a man made disaster of global scale, our greatest threat in thousands of year: climate change," said David Attenborough at the UN Climate Change Summit. "If we don't take action, the collapse of our civilizations and the extinction of much of the natural world is on the horizon. Leaders of the World, you must lead. The continuation of civilizations and the natural world upon which we depend is in your hands. Time is running out."

WHAT OTHER APOCALYPTIC WARNING DO WE NEED TO HEAR? COULD THERE BE A MORE PERILOUS MESSAGE?

The proposed methanol refinery in Kalama would pollute as much as 1.2 million cars and use millions of gallons of water from the Columbia River each day, polluting the air with cancer causing toxins.

Department of Ecology and other local decision-makers, YOU MUST BE LEADERS IN OUR FIGHT AGAINST CLIMATE CHANGE. Like it or not, the continuation of civilizations and the natural world upon which we depend is partially in your hands.

This is not a dress rehearsal. Wield your influence and be the North West climate change champions we need you to be and put an end to the methanol refinery NOW!
