

# Hillary MacDonald

We need immediate action in the climate crisis, and accepting NWIW's proposal is not the option. I have a teenage son, and I do not want him to inherit an unlivable planet. Additionally, the seismic activity in the PNW has the potential to create a disaster if this project moves forward. Please make the choice to prevent this plant to protect our communities. The project would emit unacceptable levels of CO<sub>2</sub>, and cause great damage to Washington's community, as well as to people in Oregon and British Colombia. Please reject this proposal. Thank you.
