

Bryant Mullin

Thank you name is Ryan Mullen, I may Local 26 member, 27-year member. I work in the building trades as construction electrician, wireman, I've worked on many of these industrial projects. Nuclear power houses, dams, all of these kind of things. Mills, these are good jobs. This job is environmental friendly, I've heard a lot of talk on here about how it is not. The science shows that it is. I was to talk about some green jobs. There is a windfarm being built right now in Lewis County. And there was opposition to that. That is a green job. Deposition was for whatever reason. But that is a green job. And we need to move this project forward and I'm in support of this project. We need to get this, that economy going. That community going. And I want to thank you for your time. And thank everyone for their comments.
