

Bill Adams

Please reject this project. Despite what the proponents claim, it's a dirty project and will do nothing to combat global warming. It's estimated that it would emit 4.6 million tons of carbon pollution per year. That's a lot of dirty air and it would only exacerbate global warming. In May, 2017 I was diagnosed with broncheostasis. It's an incurable lung disease. My lungs are honeycombed. While there's no cure for it it's not necessarily fatal as it can be managed. But, manage means I need to breathe clean air. And, there are many others out there like me that have respiratory problems and need clean air. While I live outside of Cowlitz County, air pollution does not respect geographical boundaries. With combating global warming in mind as well as considering people like me, please deny the project. Thank you, Bill Adams
