

JH Kelly

Hello my name is Mason Evans, I'm the president of JH Kelly, road union construction firm headquartered in Longview Washington. I value environment and support actions that reduce double greenhouse gases particularly use of transitional feedstocks and new manufacturing technologies. I support the methanol project because it brings much-needed jobs to Cowlitz County, the features that benefit the local environment such as ultralow emissions technology and equipment to mitigate for Washington air emissions. Must import lien the project reduces global greenhouse gases. After reviewing the supplemental EIS feel it a methodology to review the project.

For these reasons I ask the department of ecology to accept the conclusions and issues the shoreline and other necessary permits for the ethanol facility. Thank you.
