RECEIVED

SEP 30 2020

WA State Department
of Ecology (SWRO)

I have been going to meeting at
Longview, Wa. fairgrounds meeting place
just 5 at the start of proposed Turbo Plant
Kalama, Wa. Been to permits in Kelso, Wa.
Part of Kalama. LIME only 9 miles
away from Kalama. Its too close for me,
Scared me the effects. Too large of scale
even to be proposed to be built. ever
anywhere. I've very concerned to future
generations well being and life and
possibly unable to reproduce human
beings or 1 of side effects. So many more.
Brain fog, forgetfulness, blurred vision,
snow blindness, complete blindness, muscle
problems, neurological problems, blisters,
sores on skin. disorders, who knows! pg1
Gases and Chemicals in air and water.

Proposed Kalama-turbo Plant
Kalama Manufacturing & Export Facility

I've had Natural Gas in 2 homes. ✓
Lived the side effects and use of it.
Gas causes rotten-eggs smells, like the
old Tacoma, Wa. plants that my daddy + I
use to drive by to work.

Some Concerns use of water
4 time more than Ny. uses in
one year - just their guess or more!
How long would it take to drain down
the water so far that it would possible
harm other water front Seaport bussness,
where they could not run? Who's
going to pay for water be transported
if we get low, from where, how
much to pay for water? We cannot
promise the water. Even the Kalama City
has flooded almost every year, not
promise. We've had droughts too!
Who would pay to bring water in?
Mother Earth, wind, clouds dances,
snow clouds, hail, water we cannot promise.

Proposed Kalama Turbo Plant Kalama Manufacturing and Marine Export facility:

When a person has natural gas in house flames burn hot to touch heat's area up. ~~It would heat~~ Mother Earth up. in all her elements and surrounding water and lands and wet lands, fish and ocean life our air, and water, trees, birds. Mother Earth has been giving us warnings - earthquakes, chemicals in our ~~clear~~ clean water with ocean babies. We need to watch the signs, smell, hear, see, were being tested. We are the keepers of Mother Earth and surrounding elements. Mother Earth is our heartbeat of life. If she fails we fail next generations if we can produce life - if we make this mistake for next generation of life to survive. It's on your shoulders are you willing to take a chance for jobs and new monies in area of life for important? My daddy & I drive in Tacoma I asked Daddy why do people build big places like these that haul smoke & smell bad?

When Investor hear selling of high yield
how fast they could make monies. They
didn't think about the result. It's Greed,
lots of monies, Sounds good on paper &
meetings of investing money. How soon
they could retire. But what about people
in the area they didn't think of that.
Or even future children unborn
because of this. These people
meant well. Sometime money blinds
people thoughts. Even people that
first were invited to the (country Japan)
to see small fraction wine & dining room,
thought wow Jobs, money to our city.
But they didn't think of environmental
water, air toxins, and human problems,
effects. We all need money to live and jobs
to pay our bills at what expense!
Save our mother Earth, oceans, wetlands,
Kalamia, people lives and air and forests.
We are keepers and protectors entrusted
to not damage mother earth or energy
field.

She's has heartbeat, brings food to grow. To harvest to feed all. Thank you mother Earth we are grateful. We wish to continue in reproducing future generations life of humans on earth.

To do so we must be careful what we manufacture on or do under surface and internal underground + above

We need Department of Ecology help protect make laws and all elements forms of life earth, water, oceans. for future generations to come.

Please ~~Don't~~ let this plant be built. Please do NOT hurt our children allow them life to live, breath of fresh air!

Love and save our Planet Earth Please!

Thank you

Keep
Kalama City

Beautiful
family place!
Clean Air
