Subject: Mental Plant in Kalama

ATTN: Rich Doenges

NWIW SSEIS

WA Dept of Ecology

My question is "why are we dealing with China". We are trying to rid them from our lives. They have caused death to our pets through dog food, medicine shortages and now COVID-19 to name a few. I see other counties, cities, groups, etc. in WA wanting the methanol plant, but no one is having it built in their back yard.

Well, no one asked us. I believe the citizens of Kalama and Cowlitz County should have the opportunity of voting whether we want it in our back yard or not.

We have a pristine river which won't be staying pristine once the plant is built. Same for the air. Some of the jobs will be good for building the plant but when it's in operation, there will be only a few jobs.

I have lived here in Kalama for 45 years and will be sad to see the demise of our beautiful area.
