Dear WA Department of Ecology,

As a person of faith, I believe we are called to care for both the well-being of communities and the environment.

I am a parent and grandparent and have grave concern about what kind of world I will be leaving for them as well as all other people.

In order to slow the chances of cataclysmic results of climate change all new infrastructure supporting the production and refining of fossil fuels needs to end and our efforts need to focus on the production and use of renewal energy. Anything short of this is irresponsible and short sighted. Please recognize the negative impact this plant will have on people and our planet and deny permits for it to move forward.

Building the world's largest fracked gas-to-methanol plant in Washington does not align with my personal values of stewardship and justice, nor does it support our state's commitment to reducing climate pollution. Please reject Northwest Innovation Work's proposed methanol refinery in Kalama and deny its Shorelines Permit.

The second Supplemental Environmental Impact Statement for the Kalama methanol refinery clearly shows that this project is dirty, dangerous, and unwise. If built, our state will be locked into decades of additional climate pollution, even though we know it is past time to pursue a truly low-carbon future. Speculating that this project may displace other fossil fuels is not adequate justification for the known pollution that will harm our communities and climate.

Northwest Innovation Works has demonstrated that they are deceptive and will seek profit over people's wellbeing. They cannot be trusted to mitigate the impacts of this fracked gas refinery. The fact that the project has needed three reviews, with outspoken community opposition during each, shows that there is something wrong with it at its core. As Governor Inslee stated, we cannot support such fracked gas projects in good conscience.

You have a moral responsibility to protect public health and reduce our region's climate pollution. Please do what is right and deny this project. Thank you.

Sincerely,  
Judy LeBlanc
