

Val Alexander

I strongly object to the proposal to build such a huge gas project at Kalama. As a resident just a few mile upstream from this proposed plant, and as a Native American, whose family is indigenous to this area, I am concerned about the surrounding habitats, water quality of the Columbia River, which is the life blood of our tribe, and the huge contamination resulting from the transport, fracking, and use of this product. Please do not allow this to happen.
