

Government Council

>> My name is Bob Gregory I'm a resident of-- County, government counsel, I've seen and been involved with many different job creating projects close to-- County. The findings with the another project, it concludes it is time to permit the Northwest innovations project in Kalama and allow the county and comma in a tease to return to the economic vitality we have lost from the jobs that have occurred at warehouse or, fiber and the closure of-- resulting in the loss of 1000 jobs for after this project by the Department of ecology and using the most conservative approach, these examinations again clutter to conclude that the project will reduce greenhouse gas emissions equivalent of twice of what the entire city of Seattle produces each year. Emits each year. Even so Northwest innovations has committed to fully mitigate all the greenhouse gas what emissions in Washington and increase our global benefit. This project is one of the most environmentally sound new projects proposed in the past decade with examples such as 0 liquid discharge, traffic impacts, no solid waste and air emissions at the Southwest pollution control levels. It's time we conclude ambiguity and moving targets in the determinant of ecology to accept its own environmental impacts city and approve the permit. For the state of Washington.
