

Marilyn Mayers

Dear WA Department of Ecology,

As a person of faith, I believe we are called to care for both the well-being of communities and the environment.

Inherent in this moral imperative is investing in a livable future that is safe for all to thrive. We need to transition to clean energy as quickly as possible. Building out more fossil fuel infrastructure would lock us into higher carbon emissions and pollution which we desperately need to avoid if we are to secure a decent future for our children. Please reject Northwest Innovation Work's proposed methanol refinery in Kalama and deny its Shorelines Permit.

The second Supplemental Environmental Impact Statement for the Kalama methanol refinery clearly shows that this project is dirty, dangerous, and unwise. If built, our state will be locked into decades of additional climate pollution, even though we know it is past time to pursue a truly low-carbon future. Speculating that this project may displace other fossil fuels is not adequate justification for the known pollution that will harm our communities and climate.

NW Innovation Works is pushing for this despite widespread community opposition and the adverse environmental impact constructing this facility would cause. I urge you to reject any methanol refinery in Kalama or elsewhere in our state. Do not grant a Shorelines Permit for them to pursue this grossly immoral project. Thank you!

Building the world's largest fracked gas-to-methanol plant in Washington does not align with my personal values of stewardship and justice, nor does it support our state's commitment to reducing climate pollution. Please reject Northwest Innovation Work's proposed methanol refinery in Kalama and deny its Shorelines Permit.

The second Supplemental Environmental Impact Statement for the Kalama methanol refinery clearly shows that this project is dirty, dangerous, and unwise. If built, our state will be locked into decades of additional climate pollution, even though we know it is past time to pursue a truly low-carbon future. Speculating that this project may displace other fossil fuels is not adequate justification for the known pollution that will harm our communities and climate.

Northwest Innovation Works has demonstrated that they are deceptive and will seek profit over people's wellbeing. They cannot be trusted to mitigate the impacts of this fracked gas refinery. The fact that the project has needed three reviews, with outspoken community opposition during each, shows that there is something wrong with it at its core. As Governor Inslee stated, we cannot support such fracked gas projects in good conscience.

You have a moral responsibility to protect public health and reduce our region's climate pollution. Please do what is right and deny this project. Thank you.

Sincerely,
Dr. Marilyn Mayers
