

Maureen Canny

Please stop the proposed Kalama methanol refinery. Consider the systematic cascade of dire health, environmental and economic consequences with a continued reliance on fossil fuels. Building yet another facility dependent on the dirty extraction of raw materials is unconscionable as the climate crisis unfolds so dramatically. We do not have time to waste with the same old arguments that lock us into fossil fuels. Please see past this nonsense. We have the technology to move to cheaper renewables now. Please consider ALL the negative externalities of the proposed refinery. Thank you.
