The Kalama Manufacturing and Marine Export Facility Second Supplemental EIS Is a chilling example of valuing a temporary economic boon over generations of environmental harm. It would be a terrible mistake; and it should NEVER HAPPEN. I don't have any suggestions other than, PLEASE take it off the table. Yes, maybe they will try to take it somewhere else, but we have a duty to the children and the world to say, "NO NO NO, Not in Washington!" Department of Ecology, PLEASE do the job we trust you to do. Stop this idea now. Thank you.
