

Don Steinke

After reading the comment from Cowlitz County, I respond as follows:

As I understand it, SEPA includes ALL impacts, there is no such thing as going beyond your authority in terms of impacts or scope.

The impacts of Kalama Methanol are not likely to be mitigated. There is no way to be sure the impacts will be mitigated. In fact, the proponent plans to mitigate only the impacts within the state. Say so in your SSEIS and reject the project.
