No Methanol Plant! I live in and love the beautiful city of Kalama. My family loves this beautiful area and we fish for salmon on the pristine Kalama River. We don't want this destruction of our river and salmon habitat. The river will be impacted. Tacoma didn't allow this project and we do not want it here either. This will bring our property values down and will be an eyesore at the port. Only China benefits from this. We just get the pollution. 200 jobs will not be local. They're saying maybe 20% of the jobs may be local. They have already applied for visas for the rest.
