

## Cambria Keely

>> Hello my name is Andrea Healy, I'm in my fourth year av bachelors at Washington University and protesting the refinery for one quarter of my life. Thousands of precious hours day and night on holidays and birthdays to defeating this and telling you this to emphasize we are not here for fun, we are here because we need to ensure that Washington is headed for carbon negative future. And must be extensively considered and respected.

Every time I visit my 93-year-old father, he asked me when I plan to start a family and how many kids I want to raise. I tell him I would like to have 1 or 2 kids in my thirties. I don't tell him is that I'm terrified of what the world will look like in 20 to 30 years. Will my children have to wear a mask every where to decrease the pollutant inhalation and showing photos of a clean healthy Columbia River? Article 5 Section 1 of-- states everyone has the standard of living adequate [Indiscernible] I cannot in good function pass on to my children the burden of spending every day fighting for basic human rights.

We will not allow the consequences of the consumption of the world's largest methanol refinery here, the consequences are unavoidable and Columbia is the GESS River in our region, loosing toxins into the air that is usually clean and healthy. And the greenhouse gases. It is your mission to preserve, protect and enhance ecology and counting on you to quash this fossil fuel project.

We believe we can do other than to enforce a fossil gas dependent economy. I'm here to ask you with utmost earnestness to please deny the permits for the proposed methanol refinery.
