

Mary Duvall

building a methanol plant in the lower Columbia air shed is really a bad idea portending disaster for locals in 2 states as well as contributing to the on going destruction of the planet's climate. You know this. To even entertain such a proposal is unconscionable....The number of deaths globally from continuing the use of fossil fuels will make this pandemic pale by contrast. You know this. I don't have to quote the facts to you; you know them. I don't have to tell you that the The Chinese government-owned company NW Innovation Works corporation's arguments are specious, grasping at straws. You can see that yourselves. We have to change how we do business and how we live...we can and we must. Less plastic; more trees. Less greed; more sanity. Thank you.
