

Vic Leatzow

Good afternoon-- community since Kalama was founded. [[Background interference [fire radio]] this project would increase the budget and reduce the fire rate and increase the ability to upgrade on staffing. Which we have not done since 2002. We have greatly been involved with-- and looking at the plans for the facility. And as we are industrial based community with-- chemical facilities it uses pressure in the process but not pressure in the stories.

And safety precautions and safety systems in place with all the codes. And different than what the other industrial partners have. With that being said, we ask that this has been looked at three different times now and to move forward with this project and we hope that ecology takes out the emotion and looks at the facts. And moves forward with allowing the permits to be issued. Thank you.
