

## Susan Schwartz

Okay this project a violation of the greenhouse gas reduction that we in the legislature and state of Washington has been working on. I look outside and what is going on with the weather and all the people out there that live in the homes, they are homeless and in the southeast they are losing their homes and what is going on down there. And it is all based on this. And this would increase the state greenhouse gas emissions to almost 1 million GHG's a year and making it one of the states largest emitters of greenhouse gases. I think that is wrong. Work okay I am done now.
