

Laura Feldman

I was born and raised in Portland, OR. I'm 66 years old, and each decade brings challenges of cleaning up our toxic, chemical, and radioactive wastes while stopping the sources of this pollution. I consider this to be the most important work now and for many generations to come. Anything else, like building this methanol refinery is simply an attack on all life trying to navigate ongoing climate disruption. And, it will be seen as such further down the road (if there is more road) by our communities which we either failed or tried to protect.

The fossil fuel industry is over. Most of us know this. Please, don't support NWIW in destroying this region. We are counting on you.

Sincerely,

Laura Feldman
